

# KLEI gPOWER2 AC/IEC-AU power cable by PB

There is a WOW factor with the KLEI™gPOWER2 AC power cable, where/with...

- More/Amazing revealing Harmonic texture.
- Voices are presented with very/extremely low grain and with a lovely and revealing harmonic texture but with a full, real, natural, and organic character.
- It is really eerie and wonderful at the same time, but the music is being presented with a really natural flow and easiness of presentation.
- Acoustic instruments, such as piano, violin, guitar, trumpet, etc, are also presented with a full, real, natural, and organic character.
- The stage is very open with excellent off axis resolution/presentation, very deep and giving a more 3D/Holographic presentation. People speak of a black ground but the KLEI™gPOWER2 AC appears to deliver a stage that is beyond black, in that is the harmonics are projected with an airy and beautiful presentation while the movement of the performer remains accurate and concise within the stage, certainly an outstanding enjoyment. The amazing aspect is that while the stage is ethereal it feels and appears real, which is quite an achievement.
- The Rhythm and Timing (PRaT) sounds neither fast or slow, giving a feeling of accuracy and rightness.
- The natural timber is outstanding with a realness and fullness that is emotionally engaging and involving.
- The bass extension is quite extraordinary in that it is very low, deep, extended, tight, full, fast, accurate but natural, organic, and engaging, and real, which is quite an achievement.
- The midrange has a warm, revealing, involving, just so lovely and textural, presentation.
- The upper midrange is free of glare, clutter, and presented in a liquid and compelling manner.
- The highs are extremely fast and resolute but are presented without glare but in oh so there, airy, and real, manner.

Overall, the presentation is very balanced, refined, lingering, and the layered harmonic texture, that is presented, is excellent. The WOW factor with the KLEI™gPOWER2 AC power cord is that we feel encouraged to go through our LP and CD collection and enjoy what the KLEI™gPOWER2 AC power cord is revealing and delivering, which is an exceptionally enjoyable musical experience. Is that possible, well that is our experience and that is the experience that we are enjoying.

The KLEI™gPOWER2 AC power cable is very revealing and presents beautiful timbres and textures of the human voice. The speed of the crack of a drum is mind blowing. The noise floor is exceptionally quite/low but at the same time allowing a detailed and precise reproduction of the recording. In a nut shell the KLEI™gPOWER2 AC power cord keeps giving, without effort, a riveting performance.

The KLEI™gPOWER2 AC power cable burns in nicely and the longer it has been are running the better it sounds and it keeps on giving more and more musical improvement. We found classical music to be more involving. The violins had a sense that as the player was twisting around to get in the right position for the next flow of the bow the sound stage appeared to move with the movement of the violin.

We compared the KLEI™gPOWER2 AC power cable to the Nordost Valhalla power cord and the KLEI™gPOWER2 AC power cable gave a more resolved, very detailed, very quiet, and very neutral presentation but both the power cords are very, very good... PB 🤗🤗🤗
