## KLEI™QSeries Cables

KLEI™QFLOW7 ICs (Concert)

KLEI™QPURITY∞∞∞∞ AC/PC (Triple Infinity/Power Cable)

When the cables arrived from Australia, my/our first listening was the combination of the KLEI™QPURITY∞∞∞∞ ICs and KLEI™QPURITY∞∞∞∞ AC/PC (at the time, not yet available on the market and not priced).

If you have read my/our previous reviews I do not have to repeat all the superlatives BUT I can add the following...

- Even better background *blackness* and even better *separation*.
- This applies not only to male and female voices, but also the various instruments which are excellently separated. Thus the music is even more *airy* and even more *transparent*.
- It should also be added that our experience of listening has meant that the played music is experienced with great *openness* and exactly as it was recorded.

Although, we are not sure if this is solely due to the excellent power cable or combination, that is giving the big performance lift/improvement? I think I know that with KLEI's cables throughout the signal chain, I will achieve my ultimate system. In other words, I still require a pair of 3.0m/KLEI™QPURITY8 SCs for my system.

- *Symphonic Line RG 10 Mk4 Reference HD Master (also praised by Rolf Gemein for his excellent amplifiers),*
- *Hegel Mohican (CDP)*
- *Clearaudio Performance DC*
- *Naim streamer and Naim Uniti Core (ripper)*
- *Focal Sopra No1*

For the second listening the KLEI™QFLOW7 ICs had to be switched in place of KLEI™QPURITY∞∞∞∞ ICs together with KLEI™QPURITY∞∞∞∞ AC/PC. Here is a comparison (based on my/our memory image) with KLEI™QFLOW3 ICs. The already very good KLEI™QFLOW3 ICs (and moderately priced) has a "sibling" in KLEI™QFLOW7 ICs which of course is an (even) better cable. Whether it will be able to match KLEI™QFLOW3 ICs in terms of price and quality is a question that I/we today cannot answer.

All cables tested so far are highly recommended (see also previous reviews). It is possible to choose from KLEI's range (from the very reasonably priced entry level cables to the signature level cables at the top of the range) which are very affordable when compared to other cable manufacturers corresponding models!

Conclusion: May be that my/our review does not fully give a fair judgment (read; deserves additional superlatives) because we have restrained in our impressions/views of our experience but the thing is that the cables are *outstanding* cables (read; without competition when both price and quality are taken into account).

Tim Nilsson-Böös together with hifi buddy Christer, Sundsvall/Sweden 😊😊😊

*A highly recommended product*
