KLEI Story

Advancing the art and science of Cables, Connectors, and Electronic Components

KL (Keith Louis Eichmann), prior to 1998, had an obsession with electrons and an obsession for sonic purity, musicality, and a passion for high performance audio; the result was the Eichmann Bullet plug. KL continued to focus his attention at the atomic level with a commitment to not only preserving, but enhancing electron flow. The sonic results from the application of his theories were ground breaking. The revolutionary ideas represented a paradigm shift in cable and connector design, forever raising the benchmarks for sonic performance.

2001, the premiere product, KL's Eichmann Bullet Plug, was released to rave reviews around the world. Hi-Fi Plus magazine from the UK reported: "The benefits are huge, HUGE! They transformed the performance of affordable cables, and I can't wait to hear them on serious leads."

In the same year, a range of cables was introduced under the eXpress models. These cables were the first to incorporate KL's famous Eichmann Ratio, in which the return conductor has a carefully calculated greater cross-sectional area and mass than the signal. 2009 saw the addition to the eXpress cable range with the release of KL's Quiescence cable range.

2002, KL's AC Resonance Controlling Cable and Topper were released and were well received by audiophiles and reviewers. These incorporate KL's radical Fractal Resonance Control technology.

2005/2006, KL's Cable Pod and Bayonet Plug were released and were well received by audiophiles and reviewers. These incorporate KL's concepts and ideas which are a further development/extension of the Bullet Plug technology.

2008, KL's Quiescence cable range was released and was well received by audiophiles and reviewers. It incorporates KL's radical GnC technology, which is a further development/extension of KL's famous Eichmann Ratio. In the same year, KL's PhonoPod was released and was well received by Audiophiles and Reviewers. It incorporates KL's radical Ground Electron Channel.

2013, KL now no longer associated with ETI, formed Keith Louis Eichmann Innovations, KLEInnovations/KLEI, refer *KLEI Trademarks & Registrations*.
