## KLEI™ Harmony Connectors

### KLEI™ Classic Harmony Banana (1/KLE1D) as an Adapter

I do not do this every day, this is actually the second time for me - the first one was writing a thank you letter to someone who recommended me PMC Fact 8 speakers, which I also really dig - but nothing has ever made such an amazing difference to my system as your Harmony banana plugs.

Which is CrAzY considering their minimal cost? Well, I have actually just been joking about writing a love letter to you because your banana plugs had made such a massive transformation to my system, which is why I am writing to you right now. I have been telling people that you must be knowing of a secret ingredient that others just don't have. In any case, I felt like I needed to write to you, when I was recommending your banana plugs to a friend.

It's like my speaker cables have always been the bottle neck without me having really known about it where I often felt the need to change a song because it annoyed me somehow.

Since I have installed your banana plugs by piggybacking my speaker cable's ones onto them, this isn't the case anymore, at all. I suddenly feel like the sound is more relaxing, more spacious, more organic sounding, more bouncy and enjoyable, and more effortless, and with better decay etc etc you name it, which actually makes me want to listen to music more, and not just me, everybody here enjoys it much more.

Thus I actually feel like I would really love to change all my interconnect cables rca plugs with your top of the line rca plugs, which in turn makes me want to learn soldering just so I can do that myself. So well, your banana plugs have suddenly opened a whole new world to me, which is surely a good thing overall but also slightly a bad thing too, as right now I am also feeling a little bit of frustration that I have never tried myself at soldering before argh haha, but otherwise your banana plugs do really feel like an unexpected lottery win.

So much in fact, that to be honest, I wished I could go back in time and start off by only buying your cables.

Anyway, I just wanted to reach out to you to return some of the happiness that you instilled in my life. Lots of thanks and love, and a big kiss on your forehead, and wishing you a beautiful day, and weekend, to be continued.

All the best, Franek 🤔🤔🤔

*A highly recommended product*
